DETAILED DISCUSSION OF REFERENCES

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450

Sir:

The following is a detailed discussion of the references cited in an Information Disclosure Statement filed concurrently with this description and the above-identified application in support of a Petition to Make Special, also filed concurrently herewith.

US Patent No. 6,102,465 shows a multi-layer door panel for a vehicle which has acoustic properties. The noise insulating structure includes three sound absorbing material layers which are mounted in a vehicle headlining, dashboard or floor carpet. Each sound absorbing material or layer is capable of absorbing sound within a frequency range which overlaps on one end with the frequency range of the other material layers. Each sound absorbing material is formed of an unshaped polyester fiber mixture and binder fibers.

However, this reference fails to disclose the use of an outer scrim formed of a water repellent, air permeable material as well as any concept of tuning the air permeability of the outer layer with the sound absorption or attenuation features of a non-woven second layer to provide the desired sound attenuation as set forth by the Applicants in the above-identified application.

All of the remaining patents in the Information Disclosure Statement teach air permeable, water repellent scrims or layers for use in a variety of garments, personal care products, medical products, protective covers and outdoor fabrics.

For the reasons set forth above, it is respectfully submitted that Applicants' invention as set forth in the claims of the above-identified application

include features which are not anticipated or rendered obvious by the cited references, taken singly or in any permissible combination.

Respectfully submitted,

YOUNG, BASILE, HANLON, MacFARLANE, WOOD  
& HELMHOLDT, P.C.
